REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record submitted on January 21, 2005 fails to teach and/or suggest the method of improving the performance of a direct feed fuel cell as set forth in the instant claims with respect to providing an output power to a load within an operating range, except during predetermined time intervals during which the output power to the load is reduced to a level that is below the minimum operation output level. Applicants' instant invention does not starve the cell of fuel but instead minimizes operation output level which has not been taught or suggested in the prior art methods.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
